

# —ADVANCING— INFCIRC/908 INTERNATIONAL —WORKING GROUP—

INSIDER THREAT  
MITIGATION

## Webinar Series on Insider Threat Mitigation

In March 2024, Belgium and the United States co-hosted the 2nd International Symposium on Insider Threat Mitigation. Regulators, operators, scholars, and practitioners from around the world presented on current trends and emerging issues relevant to security of nuclear and other radioactive materials in use, storage, or transit. To advance the core tenants of [INFCIRC/908 and Revision 1](#), the Advancing INFCIRC/908 International Working Group intends to grow the community of practice by sharing lessons learned and the exchange of good practices through a bimonthly webinar series. This series will showcase selected content from the Symposium to increase global awareness of insider threat mitigation efforts.

### Details

**COST-FREE**

**Frequency:** Bimonthly beginning in December 2024

**Duration:** 1-1.5 hours

**Target Audience:** Registration is open to the insider threat mitigation community of practice.

**Registration:** <https://www.insidertreatmitigation.org/events>

**Contact Us:** [908Events@pnnl.gov](mailto:908Events@pnnl.gov)

### About the Speakers

Webinar speakers will showcase presentations delivered at the Symposium. The Advancing INFCIRC/908 International Working Group seeks geographical diversity in this series to encourage international collaboration.

### About the INFCIRC/908

At the 2016 IAEA International Conference on Nuclear Security, the United States issued IAEA Information Circular, INFCIRC/908, “Joint Statement on Mitigating Insider Threats.” INFCIRC/908 consists of two key pillars: (1) Commitment to support the IAEA to develop and implement an advanced, practitioner-level training course on insider threat mitigation; and (2) Implementation of measures to mitigate insider risks by taking a risk-informed, graded approach.
