About this Session

Session 3 will explore how behavior observation programs can complement personnel vetting and strengthen security at radiological and nuclear materials facilities. Participants will examine how structured observation, timely reporting, and appropriate follow-up can help identify potential concerns while supporting a positive safety and security culture. Designed for a global audience, the session will consider practical approaches, lessons learned, and cultural and regulatory factors that influence effective implementation.

About the Series

The webinar series on personnel vetting challenges and opportunities is organized by the Hashemite Kingdom of Jordan, represented by the Jordan Atomic Energy Commission and the Jordan Research and Training Reactor. The purpose of the webinar series is to advance INFCIRC/908 objectives to mitigate insider threats in the nuclear sector as well as to support the insider threat mitigation community of practice through the sharing of good practices and lessons learned. Five unique sessions will be conducted between April and November 2026. Session dates are subject to speaker availability and will be announced once confirmed.
