What is the Joint Statement on Mitigating Insider Threats (INFCIRC/908)?

Issued by the United States at the 2016 IAEA *International Conference on Nuclear Security*, the Joint Statement on Mitigating Insider Threats, [Information Circular 908 \(INFCIRC/908\)](#), seeks to build awareness of insider threats that pose serious risk to the security of nuclear and other radioactive materials.

Subscribing nations commit to:

- Support the IAEA to develop and implement an advanced, practitioner-level training course on insider threat mitigation, and
- Implement measures to mitigate insider risk by taking a risk-informed, graded approach.
