About this Session

Explore the connection between psychological assessment, workforce reliability, and insider risk with clinical psychologist Dr. William E. Conklin. Drawing on his experience supporting the United States Department of Energy's Human Reliability Program, this session will explore research findings on the emotional, behavioral, and workplace factors associated with safety and security concerns. Participants will consider how psychological assessment and continuous evaluation can inform efforts to reduce insider risks in nuclear facilities.

About the Series

The webinar series on personnel vetting challenges and opportunities is organized by the Hashemite Kingdom of Jordan, represented by the Jordan Atomic Energy Commission and the Jordan Research and Training Reactor. The purpose of the webinar series is to advance INFCIRC/908 objectives to mitigate insider threats in the nuclear sector as well as to support the insider threat mitigation community of practice through the sharing of good practices and lessons learned. Five unique sessions will be conducted between April and November 2026. Session dates are subject to speaker availability and are announced once confirmed.
